AMENDMENTS TO THE SPECIFICATION

Please amend the title of the invention as follows:

-- SEMICONDUCTOR DEVICE AND DATA TRANSFER SYSTEM FOR RECEIVING
DATA SIGNALS FROM EXTERNAL DEVICE --.

Please replace the paragraph beginning at page 2, l. 28, and ending at page 3, l. 3, with the following:

-- In a computer or a peripheral device, the AC coupling circuit 53 and the semiconductor device 51 is mounted on a circuit substrate. The semiconductor device 51 includes a plurality of input circuits 54. The plurality of input circuits 54 ~~are~~ is connected to a plurality of external devices 52. In such a case, an AC coupling circuit 53 is required for each input circuit 54. This increases the number of components and enlarges the connection area of the circuit substrate. --
